PROFESSIONAL SUMMARY

Trained in Information Systems and Technology, with a foundation in building and maintaining end-to-end web applications. Full stack web development, Python scripting and automation, and structured database design (SQL) form the core technical toolkit. Seeking a software or web developer role where these skills can drive efficient, well-engineered digital solutions.

EDUCATION

2023 - Present	University of Mines and Technology — Tarkwa, Ghana BSc Information Systems and Technology Web Application Development, Database Management Systems, Systems Analysis and Design
2020 To 2023	Okuapemman School — Akropong, Eastern Region, Ghana West Africa Senior Secondary School Certificate (WASSCE) Programme: General Science

WORK EXPERIENCE

November 2025 - October 2026	Programs Coordinator Intern Educ8Africa — Remote - Managed bulk communication to registered program students using Brevo CRM, keeping enrolment updates and announcements consistent across cohorts. - Built automated email workflows with Zapier, triggering instant confirmation messages to students immediately after they submitted a Google Form registration. - Coordinated facilitator readiness by liaising directly with instructors ahead of each session and maintaining the master class timetable.
May 2026 - July 2026	Freelance Web Developer Remote - Designed and built bigentertainmentart.com, a music and entertainment blog, from the ground up for a client, combining a neomorphic and glassmorphic luxury aesthetic with a fully responsive, user-friendly layout. - Developed a custom admin panel allowing the client to publish blog posts directly, manage users, and approve music track submissions from registered artists without manual intervention. - Built a bespoke text editor within the admin panel to streamline the content-publishing workflow.

PROJECTS AND LEADERSHIP

January 2026 – March 2026

Group Leader — AgriSmart Ghana

Business Intelligence and Artificial Intelligence Courses, UMaT

- Led a team of 16 students to design and build a Python-based, web-integrated multi-agent system (4 coordinating agents) for crop growth prediction, covering the full pipeline from data handling to agent logic.
- Coordinated task delegation, code integration, and testing across the team to deliver a working system within the course deadline. ([View project on GitHub](#))

July 2025 – August 2025

Web Developer — Health App

BuzzChat Hackathon

- Partnered with a teammate to build a health-focused application powered by BuzzChat's proprietary LLM, addressing a UN Sustainable Development Goal within the competition's scope.
- Handled debugging and testing of the web application, contributing to a 3rd place finish among competing teams.

WORKSHOPS/SEMINARS

29th November, 2025

PARTICIPANT, Texonnect web conference themed "The Conversation Beyond the Event: Building Africa's Collaborative Future"
Speakers included Miss Alexandra Boateng, Dr. David King Boison, and Mr. C. K. Bruce, among others

1st – 4th December, 2025

PARTICIPANT, the 2025 Data Protection Africa Summit (DPAS), Accra, Ghana
Formally opened by Hon. Samuel Nartey George, Minister for Communication, Digital Technology and Innovations.

RELEVANT SKILLS

Technical / IT

Python, Java, HTML, CSS, JavaScript, PHP, SQL, Windows OS, Zapier, Brevo CRM, Git/GitHub, AnyLogic

Soft skills

Team leadership and coordination, stakeholder communication, problem-solving and debugging, negotiation

Certifications

Cybersecurity Essentials — Educ8Africa Ghana — 2026

Languages

English (fluent), Twi — Asante and Akuapem (fluent), Fante (basic)

Hobbies and interests

Scripting and automating everyday tasks — organizing files and folders, comparing data across spreadsheets, and scraping data from public websites. Building small fun projects like group randomizers. Following tech content on YouTube, TikTok, and Instagram. Reading programming books, including
